

## The Republic of Newfoundland

It has been almost 75 years since Newfoundland joined Canada. It has been a frustrating experience. Management of the fishery by the Feds is just one of many sore spots.

Canada has a strong center that ignores its east and west. That will never change. Separation from Canada is something Newfoundland should consider.

A referendum made Newfoundland part of Canada. Another referendum could separate them. Newfoundland could become the Republic of Newfoundland. It has plenty of resources to survive on its own. Labrador could be set free. Currently, it is just a slave of Newfoundland.

Iceland had to literally fight foreign nations like the UK to protect its fishery. Newfoundland would have to do the same. Protecting the spawning grounds could be a priority. It would need a strong Coast Guard to enforce that.

Worldwide, Oligarchs (aka Elite) are everywhere. They generally hide in the shadows and control everything around them. They are motivated by power and greed.

Newfoundland has had Oligarchs for centuries. They are why it is always a mess. Because of them, democracy has never really existed in Newfoundland.

Oligarchs colonized Newfoundland. Settlers were just pawns in the process. They became Oligarch slaves.

Climate Change makes the future of Newfoundland very uncertain. It will not survive with Oligarchs in control.

Currently, young Newfoundlanders are being dictated to by politicians, who are puppets of the Oligarchs. Their future is being destroyed. They must fight the Oligarchs.

They could start by forming a new political party that is free from Oligarchs. They could give Newfoundland a new birth of freedom. They are its only hope.
