

The Manchurian Connection

The interference of the Peoples Republic of China (aka the PRC) into Canadian elections is currently in the news. It seems the PRC has intimidated the Chinese community within Canada to get certain candidates from certain parties elected. We also recently learned about Police Stations set up by the PRC within Canada. Very interesting stuff to say the least. Besides elections and police stations, one might expect the PRC to be interfering with other institutions in Canada. Universities in Canada are knee deep in Equity Diversity Inclusion (aka EDI). EDI has nothing to do with the freedom or dignity of human beings. That is just a smoke screen. EDI reeks of tribalism. It is a cancer on institutions. It should be abolished. The PRC could be behind EDI. Universities train (aka brainwash) teachers, so they influence K12. It would be a great way to indoctrinate young people. Destroy our young people and you destroy us. Our young people are being made ashamed of their ancestors. Traditions are being thrown by the wayside. It seems that the PRC only had to drop one targeted ideological bomb on us to accomplish this. It seems that its goal is to destroy western civilization. It is destroying the family unit. What is happening is not really surprising. The PRC has been destabilizing countries globally ever since it was formed.
