

## The Elite of Newfoundland

Newfoundland has been run by an Elite for centuries. They control the purse strings of the province. They are why it is always a mess.

Recently, the PUB granted a request by Newfoundland Power for \$123M of public funds for infrastructure renewal. That is about \$500 per taxpayer. Newfoundland Power is a private company with Elite shareholders that is owned by Fortis. Granting its request was basically robbery.

Recently, people who have lived on land for decades are suddenly finding out that they do not own it. Instead, the Crown owns it. This is just a land grab by the Elite.

Institution bloat is common in Newfoundland. For example, there are lots at MUN making over \$150K. The Elite benefit from this through trickle up economics.

The Elite are behind tuition increases at MUN. It provides them with a pool of cheap labor. It forces students to take jobs from them to survive. They become slaves of the Elite. They are being overloaded with debt. Elite bankers just love it.

Power from Muskrat Falls could have been used to develop Labrador. But the Snobs of Avalon wanted it delivered directly to them. Fortis wanted nothing to do with the Muskrat Falls project. Yet, it will profit from selling its electricity. This will make its Elite shareholders happy.

The scheming of Politicians regarding Wind Energy Development is nauseating. Elite developers are being given whatever they want. The Elite are not bothered by talk. It is time for the people of Newfoundland to go on a proper rampage.
